WHAT NEEDS EXPLAINING IN HUMAN SEXUALITY?

EXPLAINED COMPARED TO WHAT?

- Naive or folk view: first there come the Mommy and Daddy, then they have a baby...
how come there are exceptions?
- Moralistic view: why don't we all follow God's orders
(assuming it could be agreed that we all hear Him correctly)?
- Cynical view (sex and economics): men want to get laid, women want child support.
- Egalitarian/New Age view: men and women should be equal and similar, what went wrong?
- Naive biological view: how come we are different from other mammals?
- Kinseyan view: we are animals whose behavior needs to be studied first, judged later (if at all).

ISSUES SOME WOULD THINK NEED EXPLAINING, then:

- Marriage (uniquely human), and its varieties. Marital conflicts, esp. about "fidelity."
- The intensity of flirtation. Romance. Fantasy. Masturbation. Sex without procreation.
- Homosexuality, masturbation, prostitution, incest.
- Disdain for: homosexuality (esp. male), masturbation, prostitution, incest.
- Sexual cruelty--
 - Rape.
 - Other forms of sexual cruelty, esp. psychological (by either sex).
 - S&M (seemingly cruel behavior with strong feelings of affection and lust).
 - Love-em-and-leave-em behavior patterns.
- "Conflicts between men and women."
- Some people wanting to restrict others' behavior.
- Apparently functionless secondary sexual characteristics (pubic hair, breasts when not lactating).
